1. Seminar content

The Advanced Resistivity Imaging Seminar will provide attendees with a better understanding of 1D, 2D, 3D and 4D resistivity/IP imaging methods through the use and understanding of AGI EarthImager™ data processing software using example data sets. This course is designed for attendees who have already worked with resistivity/IP methods and want to focus on particular case examples from their work, difficult to process data or more advanced methods like time lapse inversion, 3D surveys around a foundation and other less often applied methods. We will have all of these data types to work with in the class and will not be collecting data with the SuperSting systems as is done with the Resistivity Imaging Seminar.

This class requires each attendee to bring a Windows laptop and to have administrative privileges so that they may install EarthImager (Windows 7, 8 or 10). Topics will focus on EarthImager™ software (1D, 2D, 3D & 4D), theoretical aspects of data filtering, forward and inversion modeling, 2D and 3D survey design and hands-on practice on how to process surface data, borehole data, terrain (topography) information, underwater data, continuous resistivity profiling (CRP) data on land and marine, 3D data and (4D) time-lapse monitoring data. This course meets the 15 hour Continuing Education requirement for professional development, a condition for Texas P.G. license renewal.

The hours for the three day seminar are from 9:00 a.m. until approximately 5:00 p.m. Light breakfast, lunch, and refreshments will be provided by AGI.

2. Registration and fees

The cost is \$1,640.00/person. Half price for students, with proof of current student ID.

The seminars are limited to 12 attendees and reservations will be accepted on a “first-come-first-serve basis.” If you are interested in attending, please forward your application as soon as possible to ensure that space is available and reserved for you.

To reserve a place, please submit a completed seminar application via fax or email along with your credit card information. A form can be found at the end of this document. We accept Visa, MasterCard, Discover, and American Express.

Your payment is fully refundable up to two weeks (14 days) prior to the seminar. Sorry, no refunds after that date. However, should you not be able to attend, you may apply your payment towards the next scheduled seminar.

3. Accommodations

Best Western Cedar Inn (6 miles)

4. Transportation

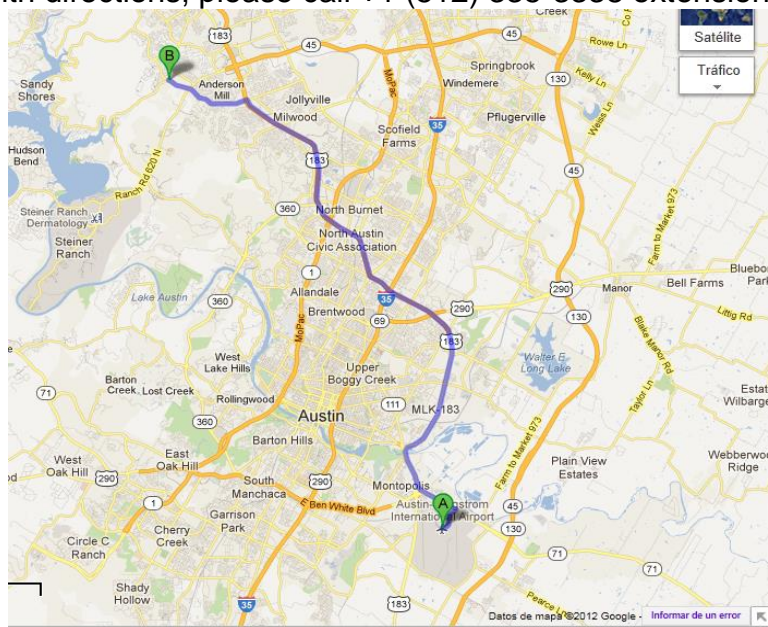

Public transportation in Austin is limited, so you may want to reserve a rental car to be picked up at the airport when you arrive.

Alamo <http://www.alamo.com>
Dollar <http://www.dollar.com>
Hertz <http://www.hertz.com>
Thrifty <http://www.thrifty.com>

5. How to find us

From the airport, take Highway 71 west. Then take Highway 183 North. Go past Interstate 35. From Interstate 35, continue on Highway 183 for approximately 8 miles. Make a left on Anderson Mill Road, cross over Ranch Road 620 and then continue for 0.8 miles. Geoscience Drive will be on your right as you come from Ranch Road 620.

For help with directions, please call +1 (512) 335-3338 extension 0.

7. Clothing

We will be indoors half of the time and outdoors the other half. Wear casual, comfortable clothes which can be used outdoors. In case of bad weather, we will simulate the fieldwork indoors.

8. Equipment

Although a lap-top is not required, we suggest that you bring one if you have one. This will allow you to follow the processing steps on your own computer.

9. Seminar Application

Please return completed application, by modem fax, attention Seminar Registration at +1.512.258.9958. Or, if emailing, please password protect the PDF attachment.
