

FAQ

SuperSting™ Monitoring System Module

Q: Can I remotely access the SuperSting™ Monitoring System?

A: Yes, you can access it from your office computer.

Q: How long can a monitoring system be in place?

A: We have clients monitoring well past 10 years. Of course, this requires a constant/refreshed power source.

Q: Can I run the monitoring system off of solar panels?

A: Yes, solar panels can be used to power the battery bank. However, solar panels are not included.

Q: Can I run the monitoring system from grid power?

A: Yes, you can.

Q: I want to monitor the influx of water in our open pit mine. Is the SuperSting™ Monitoring System suitable for this?

A: Yes, the SuperSting™ Monitoring system can send you alerts when a water break through is imminent.
