

## FAQ

### PowerSting™

**Q:** Is the PowerSting™ a constant Current or Voltage transmitter?

**A:** It can do both.

**Q:** Is the PowerSting™ rugged?

**A:** The PowerSting™ uses the rugged SKB instrument cases with built-in shock absorbers. Four casters are included so that you can easily roll the PowerSting™ around. Replacement parts are easy to source from the internet.

**Q:** Can I use the PowerSting™ and my SwitchBox to automate the data collection?

**A:** No, however, you can use the PowerSting™ Nodes for full automation of the high power transmissions.

**Q:** What is the most popular PowerSting™ System for mineral exploration?

**A:** The two most popular sizes are 28 or 56 PowerNodes at 100m separation and 180 receiver electrodes at 25 meter separation. System lengths are 2.7km and 5.5km.

**Q:** Do I need a heavy diesel generator to power the PowerSting™ high-power transmitter?

**A:** Yes. However, AGI has developed the lightest and most powerful gasoline generator on the market. Approximate weight is 450 lbs. See our website for details.
